OUR INVESTMENT APPROACH

Our philosophy unifies perspectives across investment disciplines—from private equity to credit and related strategies, and real estate—and applies them across asset classes, sectors and geographies. We believe this integrated approach offers us a differentiated capability to flexibly navigate shifting market conditions, which is at the heart of how we create and preserve value.

Private Equity

The private equity platform currently totals approximately \$14 billion in capital commitments across three closed-end funds. Centerbridge consistently looks to back strong management teams to effectuate operational improvements and other value-creating strategies that grow their businesses in responsible ways.

Credit, Distressed Strategies & Special Situations

The credit, distressed strategies & special situations platform currently totals over \$12 billion in assets under management¹ across one open-end and three closed-end funds. Employing an active investment approach across credit and related strategies, we seek to identify instruments and assets that have been either overlooked or misunderstood by the market.

Real Estate
